

First Method

Locate a ring that you already have that fits the desired finger (if this is a gift, sneak around until you find one that they wear). Print this PDF page (formatted for a standard 8.5x11 letter page) and place your ring on top of the circle that matched your ring the closest. Inside dimensions are indicated in millimeters.

Second Method

Wrap a strip of paper around your finger (you can also use string if it not stretchy. Wrap it snugly and mark it at the point where it overlaps (should make a circle) Remove the piece of paper, flatten it and compare it to the lines below.

Third Method

If you want to be absolutely sure your size is correct, order our ring sizer. For a \$10 deposit we will send one to you. When you make your purchase, \$10 will be deducted from your order.
